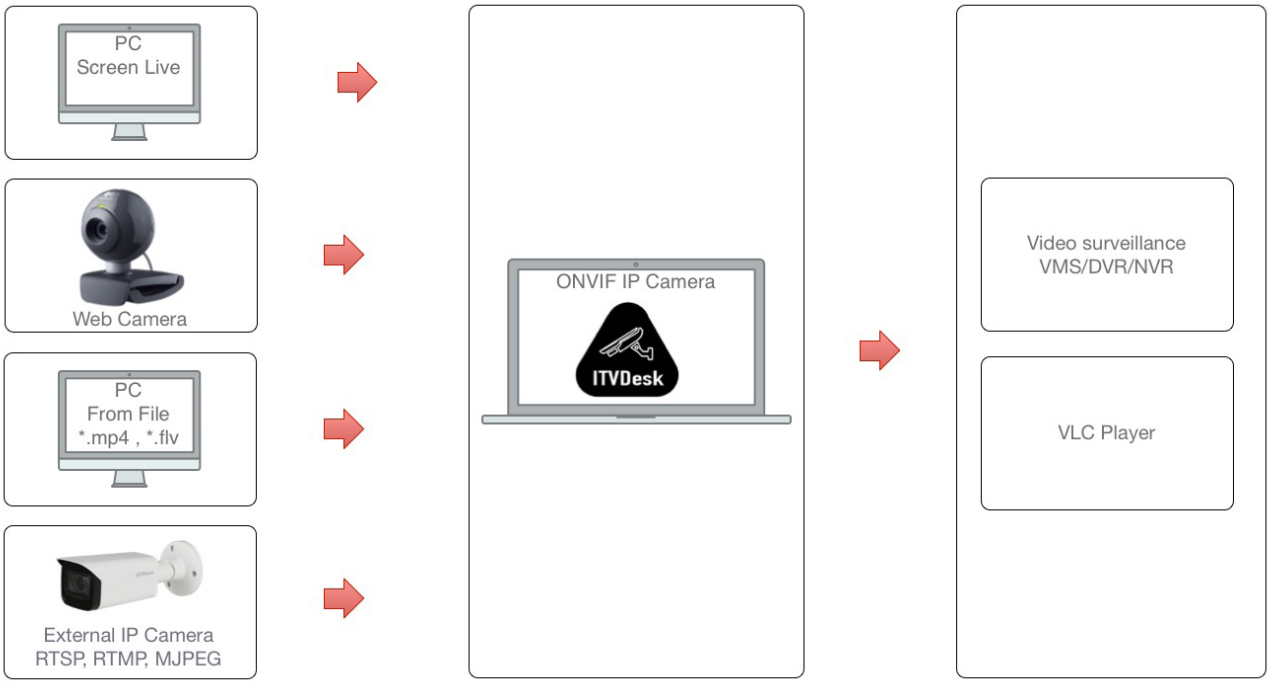
1. OVERVIEW

ITVDesk is a software solution for PC surveillance. The software allows you to shoot in real-time in high definition, picture and sound on your computer's display on a video recorder (DVR) or network video recorder (NVR). The software allows to stream a PC desktop, webcam, From File or External IP Camera via the RTSP and ONVIF protocol. Each terminal with the Windows, Linux or Mac Osx operating system can be equipped with a solved ITVDesk application. The ITVDesk is ideal for controlling POS cash registers, casinos, education, healthcare, banking, control terminals, or even controlling workforce staff.



2. COPYRIGHT, TRADEMARKS AND DISCLAIMERS

Using the software user agrees with ITVDesk software EULA.

3. LICENSE

ITVDesk software uses PC-based, hardware-tied licenses.

A license can be activated via the Internet, or manual/offline activation must be performed.

Once the license is activated, it is tied to the PC hardware. User may use the same license after reinstalling ITVDesk or Windows; however, User must purchase a new license to use the software on a new PC or request a license transfer to another PC.

Three kinds of licenses are available:

One-Time Purchase, with unlimited period and no watermark. Software updates are free during the all period of a License.

One-Year Subscription, with One-Year period and no watermark. Software updates are free during the all period of a License.

Trial, with watermark on the video feed and a 15-day demo period starting from the activation date. The user may request as many trial licenses as necessary for use on different PCs on the user's network.

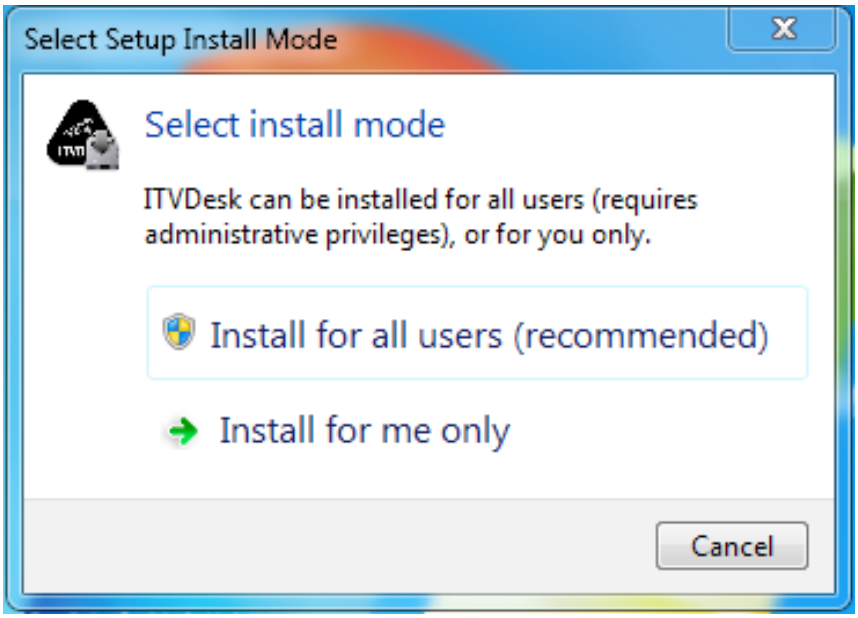
4. SYSTEM REQUIREMENTS

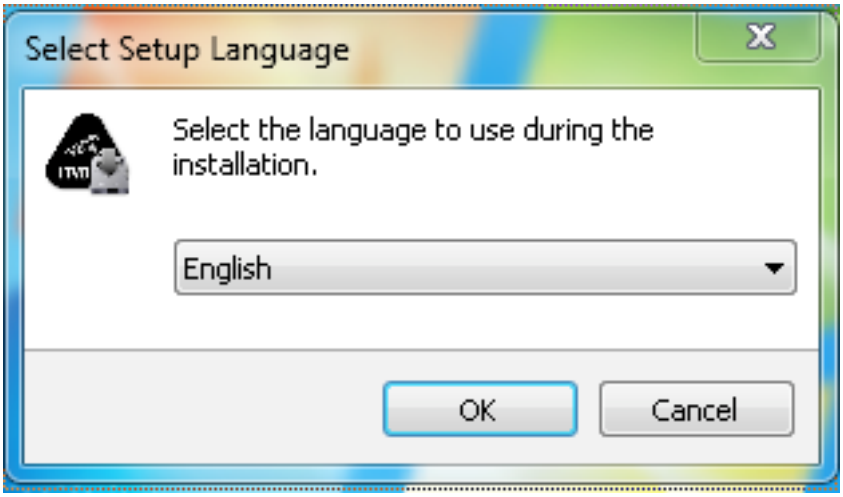
- x64 or x86 OS starting at Windows 7 SP1 or later.
- Microsoft Visual C ++ 2019 Redistributable Package (x86).
- Medium-performance PC.
- Not Internet connection required.

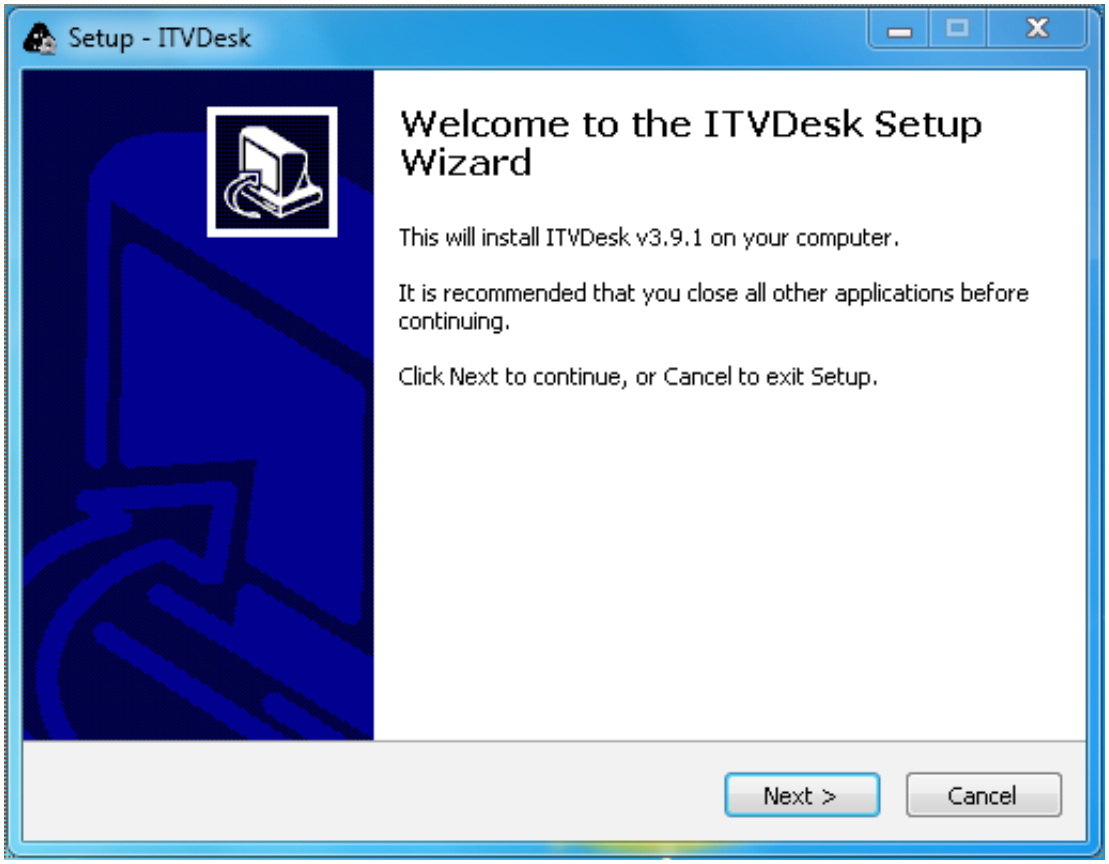
5. INSTALLATION

1. Download ITVDesk setup package Download
2. Install it
3. Click Trial button or send us request license
   - a) One-Year Subscription
   - b) One-Time Purchase
4. Activate the license via load licences file
5. Use it

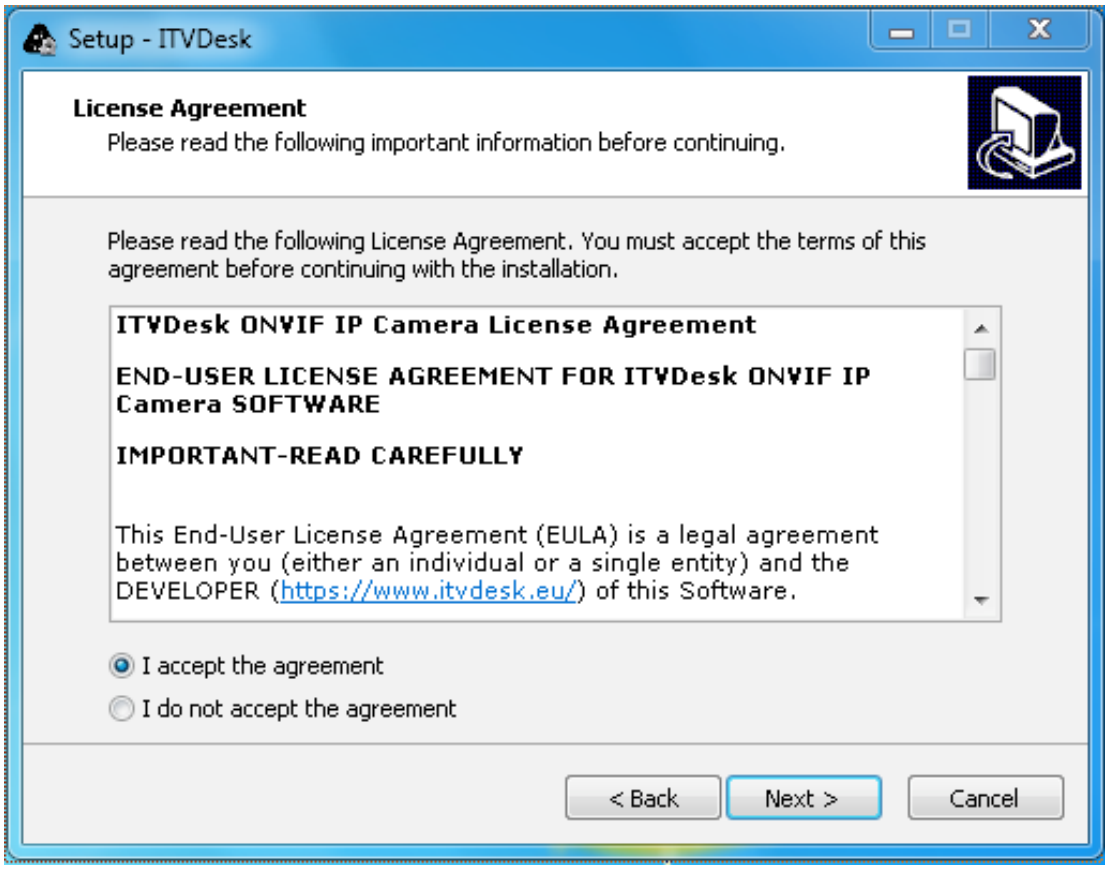
INSTALLATION ON WINDOWS PLATFORM







Setup - ITVDesk
Welcome to the ITVDesk Setup Wizard
This will install ITVDesk v3.9.1 on your computer.
It is recommended that you close all other applications before continuing.
Click Next to continue, or Cancel to exit Setup.
Next >
Cancel



Setup - ITVDesk

6. AFTER INSTALLATION

ITVDesk allows to transmit PC desktop video feed, webcam, From File, Only Audio and External IP camera as an ONVIF camera profile: T, S with audio support.

ITVDesk starts with operating system and accessible on a PORT: 7000. The software allows to select an IP address if the PC has multiple IP addresses or set automatic change.

ITVDesk video parameters could be managed directly from any ONVIF compatible NVR/XProtect like if that is a physical ONVIF IP camera.

VMS XProtect have options for Multiple Channels. Multiple Channels is give users to create full virtual ONVIF IP Camera with multiple video channels – one channel for each video input (screen or webcam).
(Example – if there are 2 monitors connected and 3 webcam, the ITVDesk will appear as 1 ONVIF device with 5 video outputs/channels.)

Multiple Cameras give users to create a new full virtual ONVIF IP Camera with one video input. This could be useful if NVR/VMS does not support ONVIF multichannel devices. In this case, ITVDesk can produce a new dedicated IP camera for each video input. All cameras will share the same IP address, but will have a different port. (Example – if there are 2 monitors connected and 1 webcam, the ITVDesk will appear as 3 ONVIF devices running on ports 7000, 7001, and 7002. Each device will have 1 video channel.)

* - *ITVDesk have* full supports of the ONVIF Profile T, S functionality.
* - *ONVIF interface compatibility is tested by ONVIF official test tool.*
* - *All stream have Transcoding, Transmuxing, Transrating and can be setting front and over ONVIF protocol*
